

**NSW AQUACULTURE
ASSOCIATION Inc.**
www.nswaqua.com.au
Objectives of the Association

1. Assist and promote the interests of Aquaculturalists throughout Australia and especially those in NSW.
2. Facilitate the dissemination of information between Aquaculturalists and to keep them abreast of the latest developments in research and production techniques etc.
3. Promote industry research and development priorities in areas critical to production, survival, purging and packaging etc.
4. Liaise with government authorities to ensure a representative of the NSW Aquaculture Association is a member of every board, committee and advisory council to represent Association members' interests and seek government assistance when required.
5. Represent the commercial interests of Aquaculturalists and present a united front to voice concerns to government authorities when required.
6. To represent the interests of member aquaculturalists first and foremost. We are not a government policy enforcement agent. We will not volunteer information on activities of any member to any government department
7. To promote the development of an environmentally responsible, sustainable and commercially viable aquaculture industry in NSW.
8. To act on members behalf to intervene with Government agencies to assist with their personal endeavours.
9. To assist members with their needs for information – if we cannot answer their queries, direct them to where answers can be found.
